## 2pc White LED Flexible Headlight Strip Kit

Prior to installation be sure to test the kit by temporarily connecting the white striped power wire to a 12 volt source and the solid black ground wire to an unpainted metal ground. Once the wires are secure, power the kit on to ensure it is fully functional before moving forward with the installation.

### Installation:

1. Lay out the LED light strips the way they will be installed on the underside of the headlight assembly. Be sure that the power and ground wires when routed to the power source will not be pinched, cut or exposed to any direct heat source or moving parts. If any physical damage occurs to the kit, it will immediately void the warranty.
  - **Optional:** It may be necessary to remove the headlight assembly from your vehicle. Please consult your owner's manual before removing and reinstalling any of your vehicle's components.
2. Once the strips and wires are mocked up, clean the mounting surface on the underside of the headlight assembly with an alcohol pad. The mounting surface should be between 45 and 85 degrees Fahrenheit to achieve the strongest bonding results from the double sided tape. **Note: The surface area must be free of all oils, moisture, dirt and wax in order for the supplied adhesive tape to bond and adhere to the installation surface correctly.**
  - **Optional:**
    - Each strip can be cut to your desired size for the mounting location. Every third LED has a copper tab that indicates where the strip can be cut. Make sure to keep the strip that is connected to the wire.
    - After cleaning the mounting surface with an alcohol pad, you can apply a 3M adhesive promoter for better adhesion. This promoter is a type of primer that combines with the 3M tape for more secure mounting.
3. Double check that the mounting surface is clean and dry. Secure each strip by using the supplied double sided adhesive tape. Once this step is complete and the strips are secure, allow ample time for the adhesive to settle and cure.
4. Route the white stripe power wire to a positive (+) 12 volt source and the solid black ground wire to a unpainted metal ground (-) location. If the wires need to be extended, use 16-18 gauge automotive grade wire for the white and solid black power wires **only**. Connect and secure the power wires only after everything is properly mounted and installed. Secure any excess wire with wire ties so that they do not get caught on any moving parts or come in contact with any direct heat source.
5. Re-Install the headlight assembly if it was removed in step 2.
6. Turn on the light strips to ensure proper functionality.

## ***Limited Warranty and Disclaimer***

All LEDGlow Lighting, LLC. products come with a one year limited warranty on the internal parts of the product. This warranty starts from the date of purchase. LEDGlow Lighting, LLC. will replace or repair any qualifying defective product received by the company before the end of the warranty period. Installation of this product must be performed by a licensed professional. Should the failure of the product be the result of damage occurring as a result of improper installation, alteration of the product or an act or omission on the part of the consumer, this warranty is void. LEDGlow Lighting, LLC. shall not be responsible for any consequential damages which arise from the use and/or installation of the product. If the kit is installed in any manner other than specified, LEDGlow Lighting, LLC. reserves the right to deny any warranty claims at the discretion of the technical support department. The one year warranty is not transferable and is valid for up to one year from the original date of purchase. Any product return must include the original packaging, a statement of the alleged defect and an RMA number must be provided. All RMA numbers are valid for 14 days from issued date. Upon receipt of the returned product, the company will test the product for defect. If the results of the testing do not support the warranty claim, do not reveal any defect or indicate consumer negligence in the installation and handling of the product, then the product will be returned to you and you will be charged a reshipping fee. If the product is returned from an address within the continental United States, within the first 14 days after purchase, and is found to be defective, LEDGlow Lighting, LLC. will cover the cost of the return shipping with an emailed return label. This offer is only valid for the continental US. All international shipping, customs fees and/or duty charges are solely the responsibility of the consumer.

## ***Additional Disclaimer Terms***

Lights are for off road use only; please check your local and state laws for the proper use of this product.

- Improper installation of electricity-using products such as lighting may cause damage to any vehicle or device to which the improperly handled or installed lighting is attached.
- Improperly installed product may cause electrical injury to persons.
- It is recommended that the kit be installed by a licensed professional.
- LEDGlow Lighting, LLC. assumes no liability for the installation of the product.
- Warranty or liability will not exceed the product purchase price which shall be the buyer's sole and exclusive remedy.

THERE ARE NO WARRANTIES WHICH EXTEND BEYOND THE WARRANTIES DESCRIBED ON THE FACE HEREOF INCLUDING ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. (LEDGlow Lighting, LLC. AT IT'S DISCRETION, MAY PROVIDE REMEDY OF RETURN OF PURCHASE PRICE OR REPAIR OR REPLACEMENT OF DEFECTIVE PRODUCT AS BUYERS SOLE AND EXCLUSIVE REMEDY.)
