Advanced 7 Color Motorcycle Lighting Kit

Warning: Please check your state and local laws before installing this kit. Each state has different policies and procedures in place for aftermarket lighting accessories. LEDGlow is not responsible for any fines that you may incur while using this motorcycle underglow kit. This kit is for off road use only.

Warning: LEDGlow recommends that this kit is installed by a licensed professional. Damage caused to this kit due to improper installation will void all warranties.

The Control Box must be installed in a dry location! If the control box is exposed to water it will cause it to fail. If any water damage and/or corrosion occur to the control box it will VOID all warranties.

Please read the following instructions thoroughly before installing your kit.

1. Lay out the motorcycle lighting strips the way they will be installed onto your motorcycle. Make sure the wires can be routed in such a way that they will not be pinched, cut, or exposed to direct heat or moving parts. If a power wire is pinched it could cause the kit to malfunction, and may void the warranty due to physical damage.
2. Once the motorcycle lighting strips and wires are mocked up, clean the proposed mounting surfaces with an alcohol prep pad. The mounting surface should be between 45 and 85 degrees Fahrenheit to achieve the strongest bonding results from the double sided adhesive. **Note:** The surface area must be free of all oils, moisture, dirt and wax in order for the supplied adhesive tape to bond and adhere to the installation surface correctly. **Optional:** To achieve a better bond between the motorcycle lighting strips and the motorcycle you can use a 3M adhesive promoter.
3. Temporarily place the motorcycle lighting strips in their intended mounting position and route the power wires to the planned control box mounting area. Use the supplied zip ties to secure the power wires to their mounting points. Be sure to keep the power wires away from the suspension, any direct heat source or moving parts.
4. Once the power wires are secured and the mounting surface is double checked to be clean and dry, secure each motorcycle lighting strip to the motorcycle by using the supplied double sided adhesive tape. Use the supplied wire ties to act as a secondary anchor and mounting point for each motorcycle lighting strip. **Be sure to use the wire ties, it is a very important step and should not be skipped.** The wire ties will help ensure that the motorcycle lighting strips stay in place during vehicle use and through seasonal temperature changes. Once this step is complete and the lighting strips are secure, allow ample time for the adhesive to settle and cure.
5. Find a safe, secure, and dry place to mount the control box. We recommend mounting it under the seat or in a water tight compartment if possible, as well as, running the distributor cable to a dry location. If this is not possible then we suggest putting the box in the driest place available. The control box is not designed to withstand any water damage, and if any does occur it will void all warranties. **Optional:** Seal the seams of the control box with silicone to prevent water damage.
6. Connect the red power wire from the control box to a 12 volt source. If the power wire needs to be extended be sure to use 14 or 16 gauge automotive grade wire. If you are running the power wire directly to the battery, and must go through the frame or any other metal parts, make sure to protect the wire by using an existing grommet or by drilling a new hole and adding a new grommet. Be sure to install a fuse within 6 inches of the power source. (Fuse is not included if you have to extend the wires.) Connecting the red power wire to a constant 12 volt source will allow the kit to remember the last color and pattern it was on prior powering down the motorcycle, if the red power wire is connected to a switched 12 volt power source the kit will not remember the last color and pattern it was last on. If you are running the red power wire to the fuse block, LEDGlow recommends that you install the wire using an add-a-circuit which is available online at www.LEDGlow.com.
7. Connect the black wire to a ground source located on the frame. You can connect the black ground wire directly to the battery or any engine ground.
8. The kit was designed using a modular locking plug system for connecting the motorcycle lighting strips to the control box. **DO NOT SHORTEN OR CUT THE WIRES. You will destroy the kit and void the warranty.**

9. **Controls:** This kit provides 7 solid colors options with multiple pattern abilities as well as several brightness levels which are easily operated using the included wireless remote. The remote includes four buttons, “A, B, C, D”:

- Button A: · Cycles through 7 solid colors as well as a color cycle and a color fade pattern.
 - Hold for 5 seconds to select brightness level when on a solid color.
- Button B: · Activates strobing pattern when a single color is selected.
 - Hold to increase pattern speed when on color cycle/color fade pattern.
- Button C: · Activates fading pattern when a single color is selected.
 - Hold to decrease pattern speed when on color cycle/color fade pattern.
- Button D: · Power On/Off

10. Once everything is connected, test the kit to ensure everything is working properly.

Limited Warranty and Disclaimer

All LEDGlow Lighting, LLC. products come with a one year limited warranty on the internal parts of the product. This warranty starts from the date of purchase. LEDGlow Lighting, LLC. will replace or repair any qualifying defective product received by the company before the end of the warranty period. Installation of this product must be performed by a licensed professional. Should the failure of the product be the result of damage occurring as a result of improper installation, alteration of the product or an act or omission on the part of the consumer, this warranty is void. LEDGlow Lighting, LLC. shall not be responsible for any consequential damages which arise from the use and/or installation of the product. If the kit is installed in any manner other than specified, LEDGlow Lighting, LLC. reserves the right to deny any warranty claims at the discretion of the technical support department. The one year warranty is not transferable and is valid for up to one year from the original date of purchase. Any product return must include the original packaging, a statement of the alleged defect and an RMA number must be provided. All RMA numbers are valid for 14 days from issued date. Upon receipt of the returned product, the company will test the product for defect. If the results of the testing do not support the warranty claim, do not reveal any defect or indicate consumer negligence in the installation and handling of the product, then the product will be returned to you and you will be charged a reshipping fee. If the product is returned from an address within the continental United States, within the first 14 days after purchase, and is found to be defective, LEDGlow Lighting, LLC. will cover the cost of the return shipping with an emailed return label. This offer is only valid for the continental US. All international shipping, customs fees and/or duty charges are solely the responsibility of the consumer.

Additional Disclaimer Terms

Lights are for off road use only; please check your local and state laws for the proper use of this product.

- Improper installation of electricity-using products such as lighting may cause damage to any vehicle or device to which the improperly handled or installed lighting is attached.
- Improperly installed product may cause electrical injury to persons.
- It is recommended that the kit be installed by a licensed professional.
- LEDGlow Lighting, LLC. assumes no liability for the installation of the product.
- Warranty or liability will not exceed the product purchase price which shall be the buyer's sole and exclusive remedy.

THERE ARE NO WARRANTIES WHICH EXTEND BEYOND THE WARRANTIES DESCRIBED ON THE FACE HEREOF INCLUDING ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. (LEDGlow Lighting, LLC. AT IT'S DISCRETION, MAY PROVIDE REMEDY OF RETURN OF PURCHASE PRICE OR REPAIR OR REPLACEMENT OF DEFECTIVE PRODUCT AS BUYERS SOLE AND EXCLUSIVE REMEDY.)
